International application No. **PCT/AU2004/001093** 

A. CLASSIFICATION OF SUBJECT MATTER	R
-------------------------------------	---

Int. Cl. 7: D21C 3/04

According to International Patent Classification (IPC) or to both national classification and IPC

### B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

DWPI: D21C 3/- & Keywords: imidazolium, triazolium, pyrazolium, pyridinium, pyrrolidinium, piperidinium, phosphonium, ammonium, sulphonium

### C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
Х	EP 957198 A (DOW CORNING CORPORATION) 17 November 1999 Whole document	1-44
X	US 2003/0041982 A (PRIOR) 6 March 2003 Whole document	1-8, 17-35
X .	US 5385641 A (BERG ET AL) 31 January 1995 Whole document	1-8, 19, 21, 26, 28-35
x	US 4652341 A (PRIOR) 24 March 1987 Whole document	1-7, 18-35

# X Further documents are listed in the continuation of Box C X See patent family annex

"A"	document defining the general state of the art which is not considered to be of particular relevance
"E"	earlier application or patent but published on or after the international filing date
"L"	document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
"O"	document referring to an oral disclosure, use, exhibition or other means
"P"	document published prior to the international filing date but later than the priority date claimed

Special categories of cited documents:

- later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family

"P" document published prior to the international filing date but later than the priority date claimed

Date of the actual completion of the international search

14 September 2004

payment of any additional fee.  As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:	Box No. II	Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
because they relate to subject matter not required to be searched by this Authority, namely:  2. X Claims Nos.: 45, 53  because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:  It is not economically feasible to search these 2 independent claims given their breadth of scope.  3. Claims Nos.:  because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)  Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)  This International Searching Authority found multiple inventions in this international application, as follows:  1. Claims 1-44. The first invention is directed to a method of treatment of a lignin-containing material with an ionic liquid, and this comparises a first "special technical feature".  2. Claims 45-57. Claim 45 is a composition claim directed to an ionic liquid comprising a substituted or unsubstituted arryl organic acid anion and an organic or inorganic eation. While claim 53 is directed to an ionic liquid comprising certain cations. Therefore the second "special technical feature" comprises the organic cation.  As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.  As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.  As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:	This internation reasons:	nal search report has not been established in respect of certain claims under Article 17(2)(a) for the following
<ol> <li>Z Claims Nos.: 45, 53         because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:         It is not economically feasible to search these 2 independent claims given their breadth of scope.</li> <li>Claims Nos.:         because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)         Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)     </li> <li>This International Searching Authority found multiple inventions in this international application, as follows:         1.
